```
public class Segement {  
    private Point A,B;  
    public Segement(int a,int b,int c,int d){  
        A=new Point(a,b);  
        B=new Point(c,d);  
    }  
    public Segement(Point A,Point B){  
        this.A=A;  
        this.B=B;  
    }  
    public Segement(Segement AB){  
        this.A=AB.A;  
        this.B=AB.B;  
    }  
}
```
